

cp Command - Examples

cp source_file destination

```
~/ ./. /.../.../workground git:>main cp source_file destination  
cp: cannot stat 'source_file': No such file or directory
```

```
~/ ./. /.../.../workground git:>main |
```

cp a.txt b.txt

```
~/ ./. /.../.../workground git:>main cp a.txt b.txt
```

```
~/ ./. /.../.../workground git:>main |
```

cp a.txt c.txt

```
~/ ./. /.../.../workground git:>main cp a.txt c.txt
```

```
~/ ./. /.../.../workground git:>main |
```

cp Src_file1 Src_file2 Src_file3 Dest_directory

```
~/ ./. /.../.../workground git:>main cp Src_file1 Src_file2 Src_file3 Dest_directory
```

```
~/ ./. /.../.../workground git:>main |
```

cp a.txt b.txt c.txt new/

```
~/ ./. /.../.../workground git:>main cp a.txt b.txt c.txt new/
```

```
~/ ./. /.../.../workground git:>main |
```

cp -R Src_directory Dest_directory

```
~/ ./. /.../.../workground git:>main cp -R Src_directory Dest_directory  
~/ ./. /.../.../workground git:>main |
```

cp -i file.txt backup/file.txt

```
~/ ./. /.../.../workground git:>main cp -i file.txt backup/file.txt  
cp: overwrite 'backup/file.txt'? y  
~/ ./. /.../.../workground git:>main |
```

cp -v file.txt backup/file.txt

```
~/ ./. /.../.../workground git:>main cp -v file.txt backup/file.txt  
'file.txt' -> 'backup/file.txt'  
~/ ./. /.../.../workground git:>main |
```

cp -n file.txt backup/file.txt

```
~/ ./. /.../.../workground git:>main cp -n file.txt backup/file.txt  
~/ ./. /.../.../workground git:>main |
```

cp -p file.txt backup/file.txt

```
~/ ./. /.../.../workground git:>main cp -p file.txt backup/file.txt  
~/ ./. /.../.../workground git:>main |
```

cp -u file.txt backup/file.txt

```
~/ ./. /.../.../workground git:>main cp -u file.txt backup/file.txt  
~/ ./. /.../.../workground git:>main |
```

cp -b file.txt backup/file.txt

```
~/ ./. /.../.../workground git:>main cp -b file.txt backup/file.txt  
~/ ./. /.../.../workground git:>main |
```

cp -i a.txt b.txt

```
~/ ./. /.../.../workground git:>main cp -i a.txt b.txt  
cp: overwrite 'b.txt'? y  
~/ ./. /.../.../workground git:>main |
```

cp -f a.txt b.txt

```
~/ ./. /.../.../workground git:>main cp -f a.txt b.txt  
~/ ./. /.../.../workground git:>main |
```

cp -r geeksforgeeks gfg

```
~/ ./. /.../.../workground git:>main cp -r geeksforgeeks gfg  
~/ ./. /.../.../workground git:>main |
```

cp -p a.txt c.txt

```
~/./../../../../workground git:>main cp -p a.txt c.txt  
~/./../../../../workground git:>main |
```

cp *.txt Folder1

```
~/./../../../../workground git:>main cp *.txt Folder1  
cp: invalid option -- 'e'  
Try 'cp --help' for more information.  
  
~/./../../../../workground git:>main |
```
