Teacher Workload Tracker

Abstract

The Teacher Workload Tracker is a simple Microsoft Access based database application designed to record and analyze the teaching hours of faculty members. The system helps manage and monitor the distribution of workload among teachers by maintaining records of classes taught, subjects handled, and hours spent on teaching activities.

The project consists of multiple related tables such as Teachers, Subjects, Classes, and Workload, linked through relationships to ensure data consistency. Teachers can enter their daily teaching sessions through a user friendly data entry form, specifying the class, subject, and hours taught. The application automatically stores these details in the database.

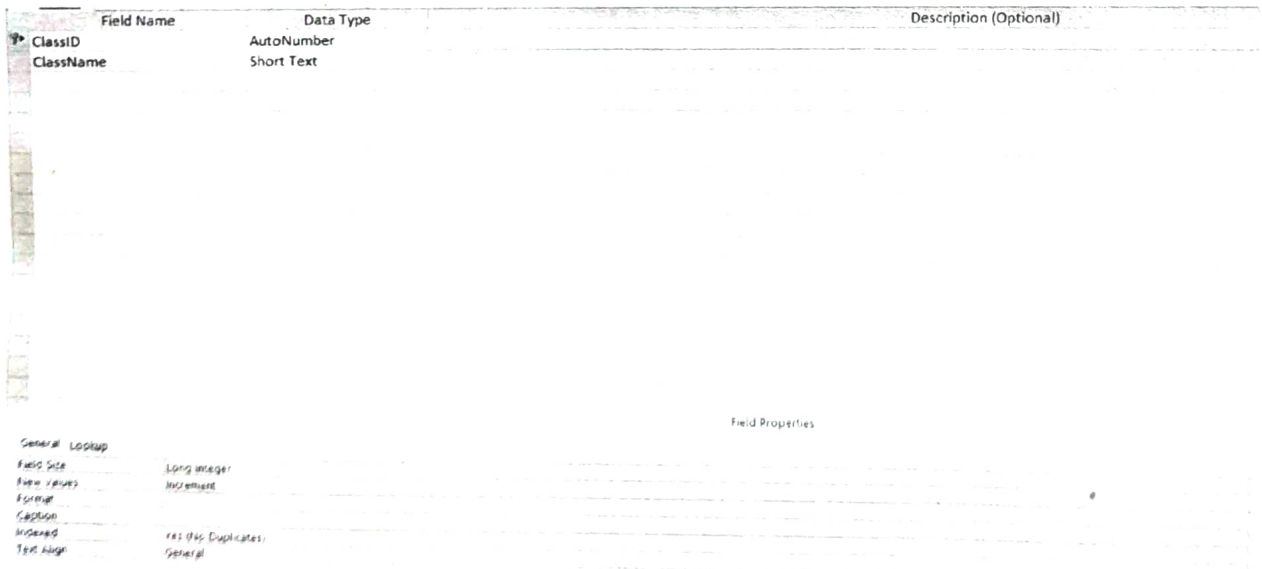

A query module is used to generate reports such as the total teaching hours per teacher, class wise or subject wise summaries, and monthly workload reports. These reports help administrators easily assess the teaching load and ensure balanced distribution of academic responsibilities.

Overall, this project demonstrates the practical use of Microsoft Access for creating a small scale information system that is efficient, easy to use, and effective for academic workload management.

Tables

1.Classes Table

2.Subjects Table

Field Name	Data Type	Description (Optional)
SubjectID	AutoNumber	
SubjectName	Short Text	

Field Properties

General Lookup	
Field Size	Long Integer
New Values	Increment
Format	
Caption	
Indexed	Yes (No Duplicates)
Text Align	General

3.Teachers Table

Field Name	Data Type	Description (Optional)
TeacherID	AutoNumber	
TeacherName	Short Text	

Field Properties

General Lookup	
Field Size	Long Integer
New Values	Increment
Format	
Caption	
Indexed	Yes (No Duplicates)
Text Align	General

4.Workload Table

Field Name	Data Type	Description (Optional)
WorkloadID	AutoNumber	
TeacherID	Number	
ClassID	Number	
SubjectID	Number	
DateTaught	Date/Time	
HoursTaught	Number	

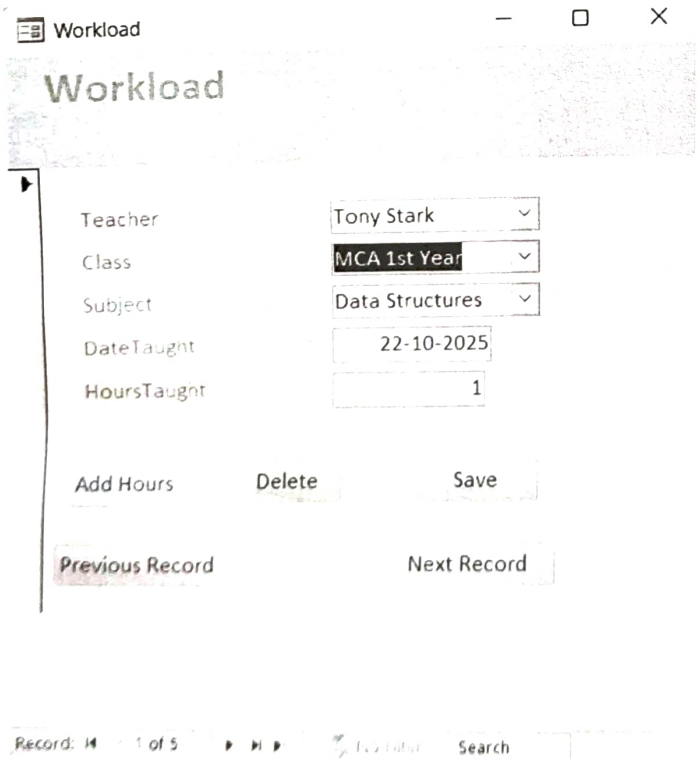

Field Properties

General Lookup

Field Size	Long Integer
New Values	Increment
Format	
Caption	
Indexed	Yes (No Duplicates)
Text Align	General

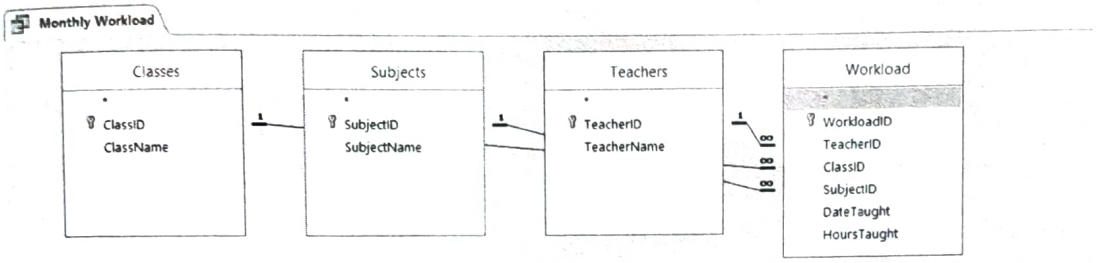

Forms

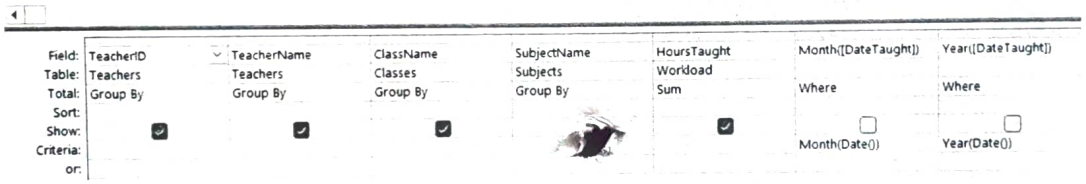

Workload Form which is used by teachers to record their daily teaching activities.

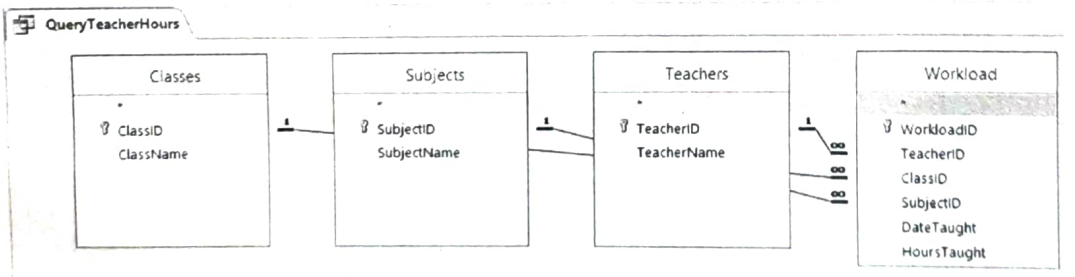

Queries

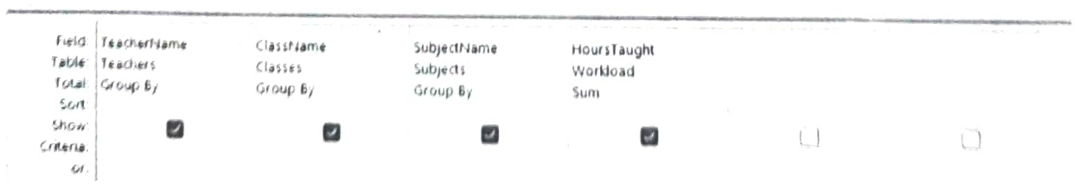

1.Monthly Workload Query calculates the total teaching hours each teacher has taught during the current month, grouped by teacher, class, and subject.

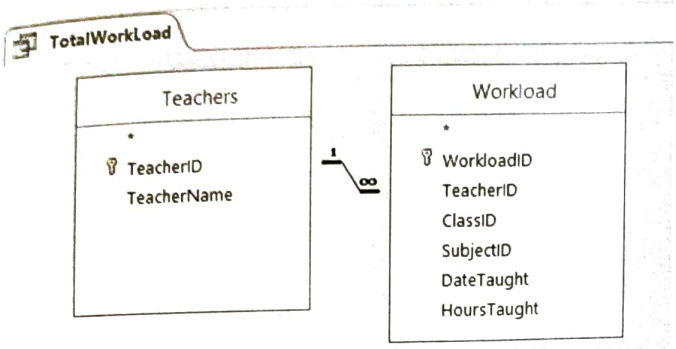

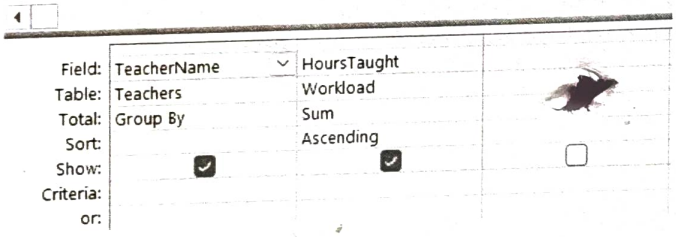

2.The Teacher Hours Query shows the total teaching hours of each teacher for every class and subject based on the records in the Workload table.

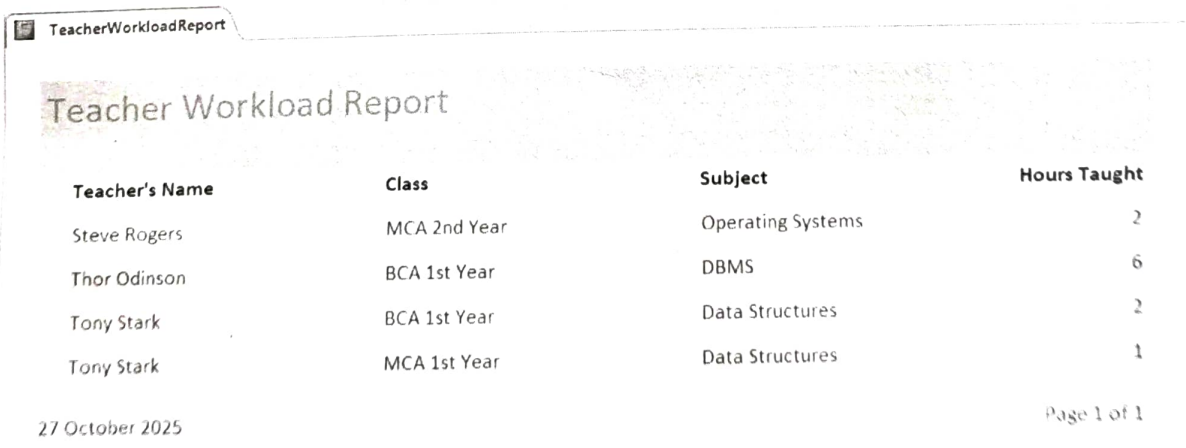

3.The Total Workload Query displays the overall teaching hours of each teacher across all classes and subjects.

Reports

1.Teacher Workload Report shows the total teaching hours of each teacher for every class and subject based on the records in the Workload table.

2.Total Workload Report displays the overall teaching hours of each teacher across all classes and subjects.
